

# ARDAC Kidney Health Study

## Screening Report

Wagga Wagga

2013

# The ARDAC Study

The ARDAC Study (**A**ntecedents of **R**enal **D**isease in **A**boriginal **C**hildren) is based at The Centre for Kidney Research at The Children's Hospital at Westmead and is investigating the early signs of kidney and cardiovascular disease in both Aboriginal and non-Aboriginal children in NSW. The first phase of the study was conducted over 6 years between 2002 and 2007 and followed the health of more than 2000 primary school children from areas across NSW. Initially participants were recruited from primary schools, however they are now screened in high schools, at home and in the community as the participants are older and some have left school. Screening in Phase 2 of the study includes measurement of height, weight, blood pressure, waist circumference and a urine test.

The results of the first phase showed no difference in presence of markers for kidney and cardiovascular disease between Aboriginal and non-Aboriginal participants. Screening for Phase 2 started in 2008. The success of the ARDAC study has been the result of the support and commitment from Aboriginal Health Workers (AHW's), Aboriginal Education Officers (AEO's), teachers, staff from the Aboriginal Medical Services, the Division of General Practice and a large number of participating schools and communities.

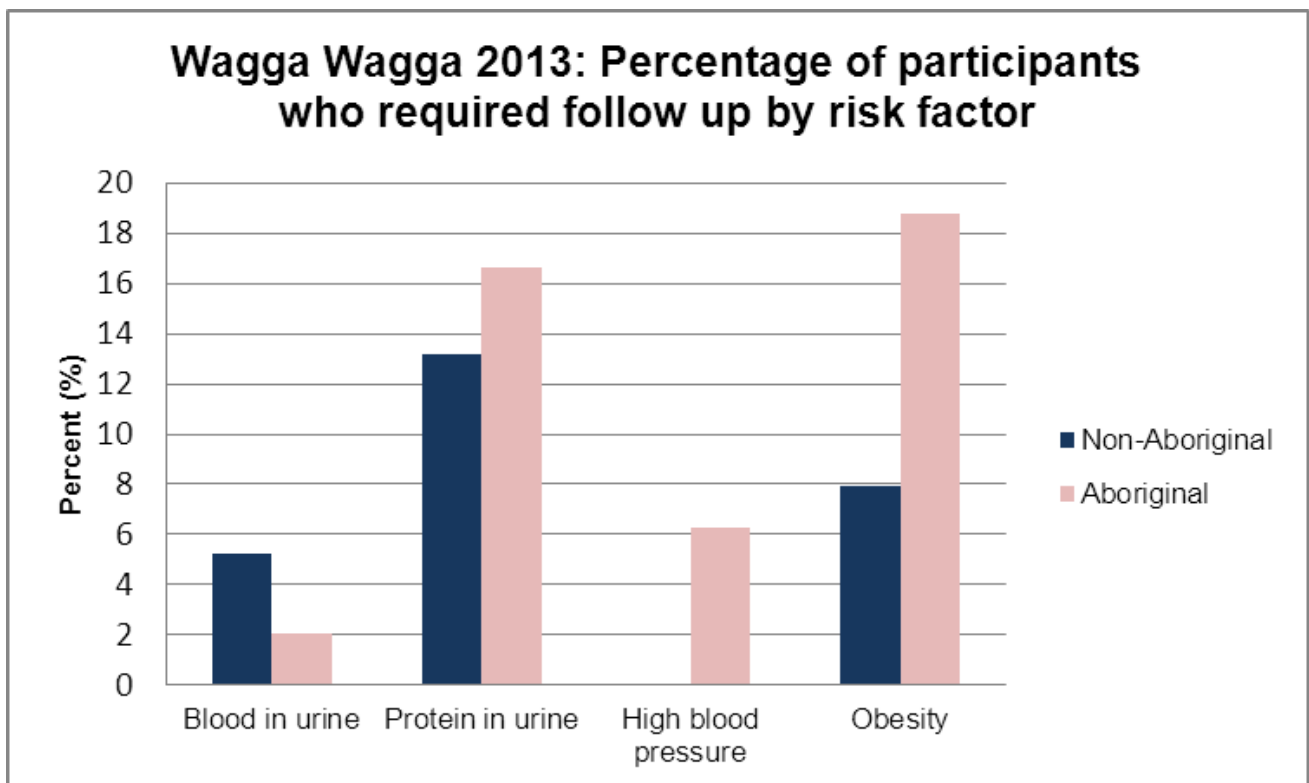

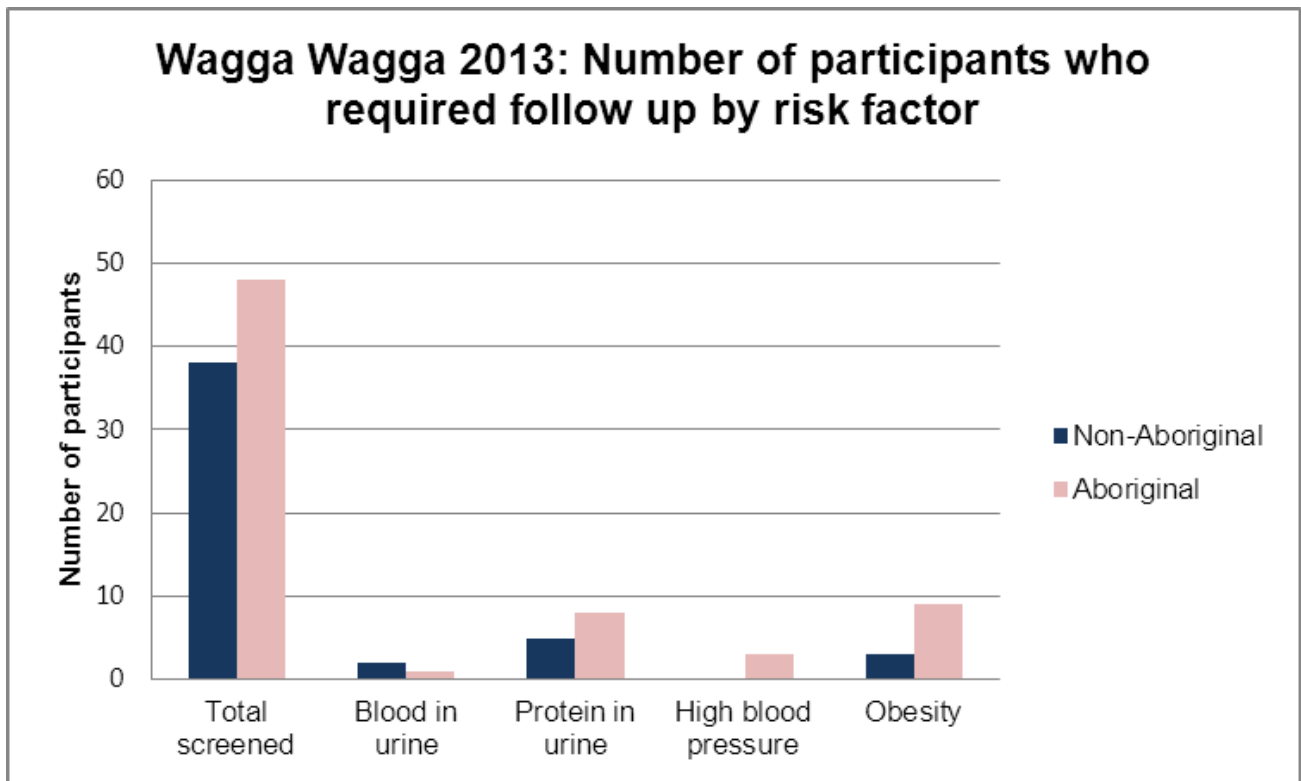

In 2013 we screened 86 participants from the Wagga Wagga area. These are the results of screening in the Wagga Wagga area in 2013.

Screening locations:

| <b>School</b>                  | <b>Participants</b> |
|--------------------------------|---------------------|
| Junee High School              | 4                   |
| Kildare Catholic College       | 2                   |
| Koorimal High School           | 2                   |
| Leeton Aboriginal Land Council | 4                   |
| Mater Dei Catholic College     | 3                   |
| Mount Austin High School       | 46                  |
| Murray High School             | 1                   |
| Narrandera High School         | 1                   |
| The Riverina Anglican College  | 1                   |
| The Rock Central School        | 1                   |
| Tumut High School              | 1                   |
| Wagga Wagga Christian College  | 1                   |
| Wagga Wagga High School        | 3                   |
| Yanco Agricultural High School | 1                   |
| Yass High School               | 1                   |
| Home Visits                    | 14                  |
| <b>Total</b>                   | <b>86</b>           |

## ARDAC Phase 2 Screening Report

Wagga Wagga 2013

The first graph shows the number of Aboriginal and non-Aboriginal participants who were referred for each risk factor. The second graph shows the percentage of Aboriginal and non-Aboriginal participants who were referred for each risk factor.

**Number of participants tested: 86**

**Ethnicity:** 44% non-Aboriginal (38) and 56% Aboriginal (48)

▪ **Blood in urine  $\geq$  1+ (25 cells/uL) excluding menstruation:**

There were 3 out of 86 participants (3.5%) who had blood in their urine, 2 non-Aboriginal and 1 Aboriginal

▪ **Protein in urine  $\geq$  1+ (30mg/dL):**

There were 13 out of 86 participants (15%) with protein in their urine, 5 non-Aboriginal and 8 Aboriginal

▪ **High blood pressure (systolic blood pressure > 95% for age ):**

There were 3 out of 86 participants (3.5%) with systolic hypertension, 0 non-Aboriginal and 3 Aboriginal

▪ **Obesity (Body Mass Index SDS  $\geq$ 2):**

There were 12 out of 86 participants (14%) with a BMI SDS  $\geq$ 2, 3 non-Aboriginal and 9 Aboriginal

### Referral

Participants are referred to their local doctor, Royal Flying Doctor Service or Aboriginal Medical Service for further investigation if one or more of the following are found during screening;

- **High blood pressure**
- **Obesity**
- **Blood, protein or albumin in their urine**

Participants who require follow-up receive instructions with their screening results.
